WHO WE ARE

Atlanta Systems Pvt. Ltd. is one of India's leading manufacturers of advanced IoT products and solutions. With over 30 years of industry leadership, we have consistently stayed ahead of the curve by embracing innovation and driving digital transformation across sectors.

ATL-440 | 4G ATL-140 | 2G

Our AIS-140 certified vehicle tracker series offers 4G/2G connectivity, Bluetooth, CAN support, high-voltage compatibility, and battery backup ensuring precise tracking, and efficient fleet management.

Logistics & Supply Chain

Vehicle Health Parameter Monitoring

Security & Surveillance

Heavy Construction Machinery

KEY FEATURES

Multiple IOs

ATL-140: DI: 4, DO: 3, AI: 2, CAN: 1*, RS-232: 1

ATL-440: DI: 4, DO: 4, AI: 2, CAN: 1, RS-232: 1; RS-485: 1*, 1-Wire/ 1-RPM: 1*

AIS 140 Certified

AIS 140 compliant tracker as per MoRTH guidelines certified from ICAT for all public and commercial transportation in India

Built-in Battery Backup

Sustained power for prolonged operational efficiency, minimizing downtime and enhancing reliability

Integrated CAN Port

Its built-in CAN port provides seamless connectivity for real-time vehicle data monitoring and diagnostics

* represents optional

EL-440 | 4G

Our flagship EV tracker offers 4G/CAT-1 with 2G fallback, BLE connectivity and ECU monitoring in a rugged, waterproof cabinet for reliable, real-time insights.

Heavy Construction Machinery

Logistics & Supply Chain

Vehicle Health Parameter Monitoring

Security & Surveillance

KEY FEATURES

Multiple IOs

DI: 4, DO: 4, AI: 2, CAN: 1, 1-Wire: 1, RS232/RS485: 1

Advanced Network Support

Advanced CAT-1, LTE, BLE connectivity with 2G fallback ensures uninterrupted operations

9-90V Voltage Range

9-90V voltage range enables extended device electrical security and enhanced performance efficiency

Integrated CAN Port

Its built-in CAN port provides seamless connectivity for real-time vehicle data monitoring and diagnostics

EL-400 | 4G

EL-100 | 2G

Power-packed EV devices bring 4G/2G connectivity, BLE, wide voltage range, battery analytics, and CAN support—perfectly designed for tracking of electric and performance-driven vehicles.

Charging Infrastructure

EV Fleet Management

Energy Storage System

Smart Logistics

KEY FEATURES

Multiple IOs

EL-400: DI: 3, DO: 2, AI: 1, 1-Wire: 1, CAN:1, RS232: 1

EL-100: DI: 2, DO: 2, AI: 1, 1-Wire/ 1-RPM: 1, CAN:1

BLE Connectivity

BLE facilitates connectivity with universal BLE sensors and beacons

9-90V Voltage Range

9-90V voltage range enables extended device electrical security and enhanced performance efficiency

Integrated CAN Port

Its built-in CAN port provides seamless connectivity for real-time vehicle data monitoring and diagnostics

L-400 | 4G

L-400+ | 4G

Vehicle trackers feature 4G connectivity, GNSS accuracy, waterproof design, BLE integration, and wide voltage support, ensuring reliable monitoring and efficient, streamlined fleet management operations.

Industrial IoT Solutions

Boiler Monitoring System

Mobile Tower Management

Cold Chain Supply Management

KEY FEATURES

Multiple IOs

L-400: DI: 4, DO: 1, AI: 1, 1-Wire/RS232/RS485: 1*

L-400+: DI: 4, DO: 2, AI: 1, 1-Wire: 1, RS232/RS485: 1/1*

BLE 5.0 Connectivity

BLE facilitates connectivity with beacons, fuel level sensor and TPMS

Rugged IP54 Casing

The IP54-rated casing ensures robust protection against dust and water immersion

High Voltage Range

High voltage range enables extended operation and enhanced performance efficiency.

EC-400 | 4G

Advanced 4G EV tracker with GNSS, Bluetooth, CAN interface, IP67 casing, and ECU monitoring capability ensuring precise tracking and efficient fleet management.

AC Monitoring

Electric L3 & L5 Fleet

Logistics & Supply Chain

Renewable Energy Source Monitoring

KEY FEATURES

Multiple IOs

DI: 2, DO: 3, AI: 1, 1-Wire: 1, CAN: 1

Advanced Network Support

Advanced CAT-1 tracking device with 4G LTE and dependable 2G backup for reliable connectivity

BLE 5.0 Connectivity

BLE facilitates connectivity with BLE beacons, humidity, and temperature sensors

Integrated CAN Port

Its built-in CAN port provides seamless connectivity for real-time vehicle data monitoring and diagnostics

WP-30L | 2G

AIS-140 compliant GSM vehicle tracker with IRNSS and GNSS location accuracy, rugged IP65 design, delivering reliable real-time tracking, enhanced security, and operational control for regulated fleets.

Theft Prevention

Commercial Vehicles

Mining

Security & Surveillance

KEY FEATURES

Multiple IOs

DI: 7, DO: 4, AI: 2, RS232: 1

Rugged IP65 casing

The IP65-rated casing ensures robust protection against dust and water immersion.

AIS 140 Certified

AIS 140 compliant tracker as per MoRTH guidelines certified from ICAT for all public and commercial transportation in India

Built-in Battery Backup

Sustained power for prolonged operational efficiency, minimizing downtime and enhancing reliability

AVD-100 | DASHCAM

Atlanta's AVD-100 offers a comprehensive road video monitoring solution with real-time footage, enhancing driver safety, and incident recording for efficient fleet and transportation operations.

H.264/H.265 Video Compression

Wi-Fi Antenna

8-36V DC Voltage

4G Connectivity

RS232 & RS485 Port

ATL-DSM-V1 | DSM Camera

ATL-DSM-V1 Mini ADAS Dashcam offers advanced driver assistance with real-time alerts, and a compact design, enhancing road safety and driving efficiency.

-25°C~75°C Temperature

100W CMOS Sensor

25 FPS

12V DC Voltage

FSK-1000

FSK-1000 Wireless Fuel Level Sensor offers precise capacitive fuel monitoring with BLE connectivity, smartphone configuration, seamless telematics integration, and long-lasting battery for reliable fuel tracking.

Municipal Fleet

Emergency Fleet

Security Fleet

Commercial Fleet

KEY FEATURES

Built-in Battery Backup

Sustained power for prolonged operational efficiency, minimizing downtime and enhancing reliability

Hassle-Free Setup

Designed for easy installation and minimal maintenance, ensuring reliable operation in remote environments.

BLE Connectivity

Leverages Bluetooth 4.2 technology for seamless, secure wireless data transmission

Rugged IP67 casing

The IP67-rated casing ensures robust protection against dust and water immersion.

E-101 | 2G

LC-100 | 2G

Our compact 2G basic tracker series combines high GNSS accuracy, dependable battery backup, and secure GSM connectivity—offering reliable and efficient vehicle tracking for fleet management.

Logistics & Supply Chain

Security & Surveillance

Gig Worker Tracking

Theft Prevention

KEY FEATURES

Multiple IOs

E-101: DI: 1, DO: 1

LC-100: DI: 1+1*, DO: 1

Higher GNSS Accuracy

Higher GNSS accuracy ensures precise location tracking and navigation capabilities

Built-in Battery Backup

Sustained power for prolonged operational efficiency, minimizing downtime and enhancing reliability

Motion Sensor

Precise motion detection with smart integration and energy-efficient performance

SenseEV | 2G TC-100 | 2G

Our advanced 2G tracker series offers Bluetooth, GNSS, high-voltage support delivering reliable monitoring, enhanced security, and seamless performance for modern vehicles.

Municipal Vehicles

Theft Prevention

Logistics & Supply Chain

EV Fleet Management

KEY FEATURES

Multiple IOs

TC-100: DI: 2, DO: 1, AI: 1
SenseEV: DO: 2

9-90V Voltage Range

9-90V voltage range enables extended device electrical security and enhanced performance efficiency

BLE Connectivity

BLE facilitates connectivity with beacons, fuel level sensor and TPMS

Built-in Battery Backup

Sustained power for prolonged operational efficiency, minimizing downtime and enhancing reliability

GWC-100 | 4G

Our robust IoT Gateway supports LTE, Wi-Fi, BLE, USB, and Ethernet for seamless connectivity and device integration. Ideal for ESS monitoring and telecom tower management, it ensures real-time data flow.

Energy Storage System (ESS)

Gensets Monitoring

Mobile Tower Data Monitoring

Logistics & Supply Chain

KEY FEATURES

Built-in Battery Backup

Sustained power for prolonged operational efficiency, minimizing downtime and enhancing reliability

9-90V Voltage Range

9-90V voltage range enables extended device electrical security and enhanced performance efficiency

BLE & Wi-Fi Connectivity

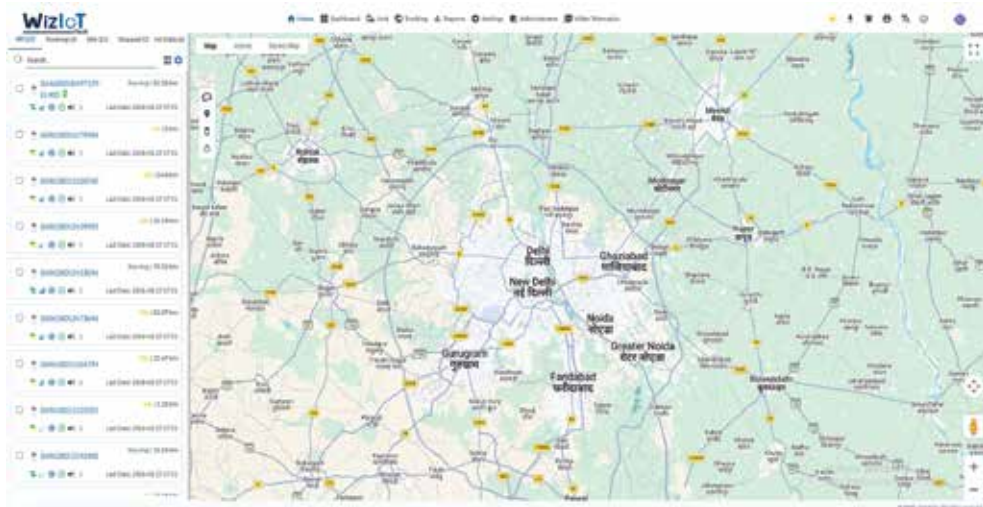

BLE and Wi-Fi enables local pairing and configuration, ideal for battery swapping and industrial IoT

Integrated CAN Port

Its built-in CAN port provides seamless connectivity for real-time vehicle data monitoring and diagnostics

Wiziot is a smart platform offering real-time tracking, route optimization, and analytics to enhance fleet efficiency, safety, and cost control.

KEY FEATURES

Analytical Intelligence & Reporting

Real-time cell-level diagnostics and comprehensive battery pack insights for enhanced EV fleet efficiency

Live & History Playback Tracking

Monitor real-time vehicle movement and replay historical routes with detailed insights for complete trip visibility

Comprehensive Alerts & Notifications

Provides instant alerts for overspeeding, geofence breaches, ignition status, low battery, and more, ensuring safety
